

Assignment #4

Do programming exercise 4.21 in the textbook, with the following modification:

- If SSN# user input is invalid, provide 1 of 3 feedbacks to the user
 1. "You entered an invalid Social Security Number." 20%
 2. "Can't you follow directions?" 40%
 3. "You are not very smart are you?" 40%

So, the response #1 should come out 20% of the time, #2 40% and #3 40%.

Use a random number generator to select which response is selected.
